

E-Commerce Design & Dev for Web Design Agency

PROJECT DETAILS

 API Development, UX/UI Design, E-Commerce Development

 Feb. 2026 - Mar. 2026

 Less than \$10,000

"They stay current with modern technologies and trends."

PROJECT SUMMARY

UpCodo Digital provided web development services for a web design agency. The team built a multilingual e-commerce platform with a custom UI/UX design, a product management system, and local tax compliance.

PROJECT FEEDBACK

UpCodo Digital successfully launched the e-commerce platform, enabling multi-country sales and reducing manual order and inventory management. The team managed the project efficiently, meeting deliverables on time and responding to changes and feedback. They were easy to work with.

The Client

Please describe your company and position.

I am the Dir of Taiwan Web Designs

Describe what your company does in a single sentence.

We provide end-to-end web design, custom development, and hosting solutions that help businesses grow online

The Challenge

What specific goals or objectives did you hire UpCodo Digital to accomplish?

- An additional objective was e-commerce development — building custom online stores for our clients with full shopping, payment, and inventory functionality.
- Our goal was to have a reliable development partner who could execute on client projects — from design implementation to full custom builds — while maintaining our agency's quality standards

The Approach

How did you find UpCodo Digital?

- Referral
- Other

Why did you select UpCodo Digital over others?

- Great culture fit
- Referred to me
- Company values aligned

How many teammates from UpCodo Digital were assigned to this project?

2-5 Employees

Describe the scope of work in detail. Please include a summary of key deliverables.

The project involved the full design and development of a multilingual e-commerce platform for a Europe-based client. The scope covered front-end design through to a complete back-end system, including the following key deliverables:

Multilingual Website — Full multi-language support to serve the client's European market across multiple regions and languages.

E-Commerce Store — A fully functional online store with product listings, categories, and a seamless customer shopping experience.

Multiple Payment Gateways — Integration of several payment providers to support the client's diverse customer base across different countries.

Shipping Management — Internal shipping logic with region-specific rules, rates, and carrier options tailored to European logistics.

Local Tax Compliance — Automated tax calculation based on customer location to meet EU tax and VAT requirements.

Inventory & Product Management System — A complete back-end dashboard allowing the client to manage products, stock levels, variants, and orders in real time.

Front-End Design — Custom UI/UX design delivering a professional, brand-aligned shopping experience optimized for desktop and mobile."

The Outcome

What were the measurable outcomes from the project that demonstrate progress or success?

Successfully launched a multilingual e-commerce platform serving multiple European markets

Reduced manual order and inventory management through a centralized back-end system

Enabled multi-country sales through localized tax, shipping, and payment gateway support

Delivered a mobile-optimized storefront that improved the overall customer shopping experience

Gave the client full independence to manage products, stock, and orders without developer dependency

Describe their project management. Did they deliver items on time? How did they respond to your needs?

Akshay and his team at UpCodo Digital managed the project efficiently with clear communication throughout. Deliverables were met on schedule, and they kept us informed at each stage of development. When requirements evolved — as they often do in complex e-commerce builds — they responded quickly and adapted without disrupting the overall timeline. Their responsiveness to feedback and change requests was consistently professional.

What was your primary form of communication with UpCodo Digital?

- In-Person Meeting
- Virtual Meeting
- Email or Messaging App

What did you find most impressive or unique about this company?

What stood out most about Akshay and his team at UpCodo Digital is how easy and enjoyable they are to work with. Communication is always straightforward, and Akshay himself is consistently available whenever you need him — which is rare and genuinely valuable in this industry. The team is flexible, responsive, and never makes you feel like a burden when priorities shift or questions come up.

What also sets them apart is their longevity and relevance — I have been working with Akshay for nearly 20 years, and in that time they have continuously evolved with the industry. They stay current with modern technologies and trends, which means you are always getting solutions built on up-to-date stacks rather than outdated approaches. That combination of long-term reliability and modern technical capability is truly unique and hard to find in a development partner.

Are there any areas for improvement or something UpCodo Digital could have done differently?

Honestly, it is difficult to find areas for improvement — Akshay and his team consistently delivered on every front. If anything, I can only say that I wish my own company ran as smoothly as theirs. From communication to delivery to technical execution, they set a high bar. If I were to suggest anything at all, it would simply be to keep doing what they are doing — because it clearly works.
